

Ivanchuk Ivan, Java developer

(+7) 988-061-84-72 | l3r8y@duck.com | t.me.l3r8y | [blog](#) | github.com/l3r8yJ | [linkedin](#)

Experience

Open Source contribution | 24.06.2022 - now.

- R&D development. Worked on code quality control tools, eolang programming language, maven plugins
Java, Maven, XSL, Docker, Unit Testing, Integration Testing, Rust, Ruby, EO, L^AT_EX

INTERVOLGA | 19.04.2022 - 04.08.2022

- B2B development. Worked on integration of 1c-bitrix
PHP, 1c-bitrix framework, SQL

Freelance | May 2021 - April 2022

- Development of telegram bots
Java, TelegramBots, Spring, SpringBoot, SpringData, Docker

Projects

Phi Reducer

- An experimental project to reduce phi-calculus expressions.

[\[Link\]](#)

Coq, phi-calculus, functional programming

Elegram api

- Elegram-api is a wrapper over the telegram bots api, but in the style of EO. More object-oriented, more maintainable

[\[Link\]](#)

Java, Qulice, rultor, Opdd, CactooS, jcabi-http

Jini the library

- Class Jini helps you build an XPATH and then modify its parts via simple fluent interface, 4500+ downloads

[\[Link\]](#)

Ruby, MiniTest, XML, RubyGems

Skills

- Java | Spring, SpringBoot, SpringMVC, Hibernate, Maven, Invoker
- SQL | MySQL, PostgreSQL
- CI/CD | Docker, GitHub Actions, rultor, Opdd
- VCS | Git, GitHub
- Other | Ruby, Rust

Languages

English | B1 intermediate

Russian | C1 native

Education

Volgograd State Technical University |

Bachelor, Engineering and Economics, Software engineering

2020 - 2024

Courses and etc. |

Completely self-taught by reading books and practicing a lot.

I also have a small blog about software, perhaps it will be of interest to you. [\[link\]](#)
